

CIMINIERE F2

Design
Dante Donegani,
Giovanni Lauda

Year
2011

Description

Is a family of floor lamps, thin and slender, that remind the industrial chimneys, typical elements of the Italian landscape. Using a LED technology, they grant brightness and energy efficiency. They are fitted with a light/control on the body of the lamp, and a solid base in die-cast aluminum. Ciminiere d'Italia are proposed in three variants (circular section, squared section, octagonal section) and with different chromatic finishes to perfectly adapt in various environments.

Materials

Powder-coated extruded aluminum body.
Die-cast aluminium base painted.
Transparent power cable. On/off and dimmer functions by means of a push button on the body.

Certifications

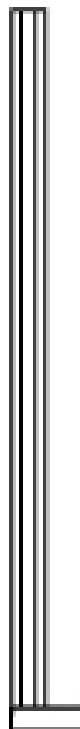

CE  IP20 

Uses

Floor

Dimensions
