

Ciminiera F3

Design
Dante Donegani,
Giovanni Lauda

Year
2011

Description

Is a family of floor lamps, thin and slender, that remind the industrial chimneys, typical elements of the Italian landscape. Using a LED technology, they grant brightness and energy efficiency. They are fitted with a light/control on the body of the lamp, and a solid base in die-cast aluminium. Ciminiera d'Italia are proposed in three variants (circular section, squared section, octagonal section) and with different chromatic finishes to perfectly adapt in various environments.
