

Description

MultiPot is Rotoliana's first multifunctional lamp. The shape of the vase - the archetype of containers - provides both light through its LED bulbs - which creates a certain atmosphere - and other performances as well. The multiple socket (5 plugs) integrated in the lid entirely loses its traditional aspect. The vase contains and conceals both the power supply and unsightly wires. The lid functions as an open tray for objects; being luminous it is visible in the dark. MultiPot comes in two lines of colours: "Classic" (white, black, chrome, transparent and amber), "Glam" (gold, pink gold, black pearl and glam red), refined and glittering, a line of colours inspired by the sensuous and alluring charm of metals. Mention Award at the XXI Compasso d'Oro ADI, 2008.
